

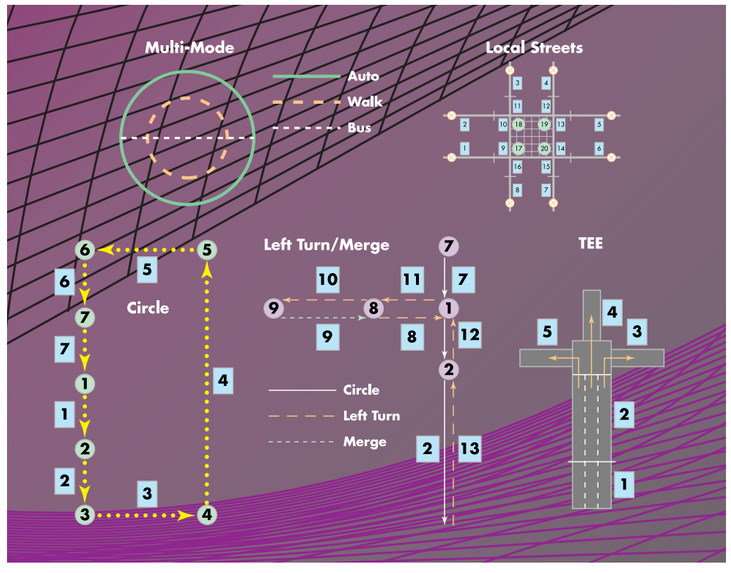
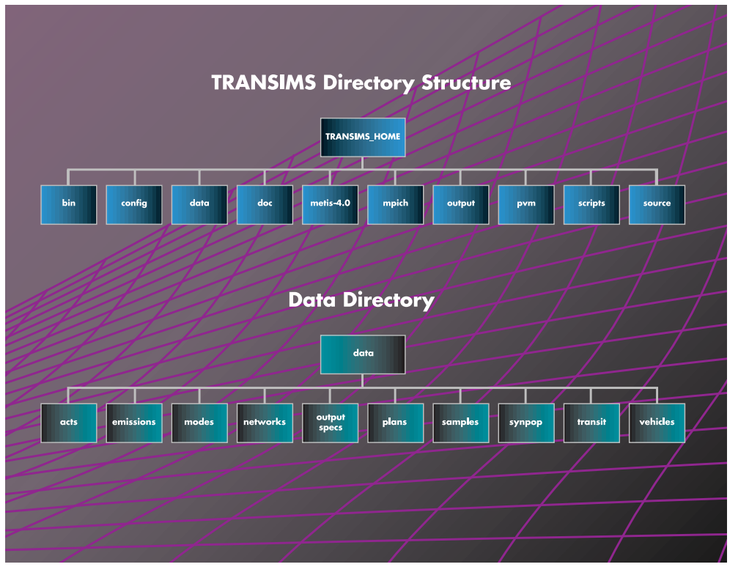
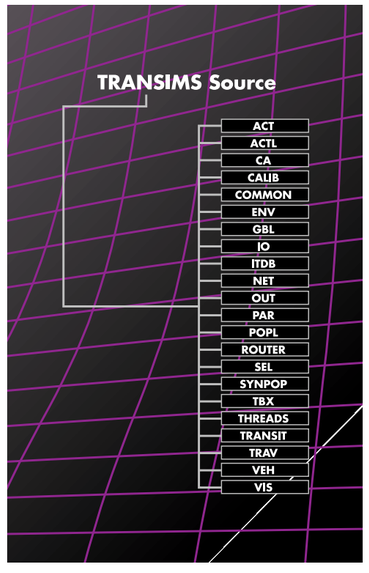
CD Information

"Mobility is an essential part of being human and, certainly, an essential part of how we impact our environment and how we interact with one another every day."

CD INFORMATION






- What's on the CD
  - Distribution description
- System requirements
  - Hardware requirements
  - Memory requirements
  - Disk requirements
  - Operating system (Red Hat Linux, version 5.2)
  - Software requirements
    - Mesa/GL libraries (MesaGL, MesaGLU)
    - X11R6 libraries (Xmu, Xt, X11, Xext, Xt)
    - Open GL Utilities Toolkit libraries (glut)
    - Linux libs (stdc++, ld-linux, ICE, SM)
    - Perl
  - Compilation requirements
    - Linux - kernel headers
    - Compiler - Egcs C++ (egcs 1.0.3a or higher)
    - Glut Release 3.0 or higher
    - Mesa/GL 3.0
    - X11R6 - include files and libraries
    - Metis, pvm, mpi, and xforms from TRANSIMS distribution
    - Gnu make
  - Third party software
- Installation
- Getting started
  - Running a microsimulation calibration
  - Feedback iterations using the multimode network
  - Running TRANSIMS components on local streets network
